## **ELECTION/RESTRICTION**

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

1. Group I includes claims 1-23 and 27-40 drawn to a method of assembling an ink filtration system in fluid communication with an ink source, classified in Class 347, subclass 93.
2. Group II includes claims 24-26, drawn to an ink cartridge, classified in class 347, and subclass 87.
3. Group III includes claims 41-44, drawn to method of welding joint connections by using laser, classified in class 219, subclass 121.64.

Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions. The invention I relates to the method for mounting an ink filtration system in fluid communication with an ink source and the invention II relates an ink cartridge while the invention III relates to the method of welding joint connections by using a laser.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or for Group III, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
